

**carmenta**  
superior situational awareness

## Experienced Software Developer

*Carmenta is a growing software company that develops geographical information systems (GIS) for mission critical applications world wide. Our customers are major development organisations with very high requirements on performance, quality and reliability. Carmenta based products are used in advanced command and control applications for defense and security and also in high traffic web solutions. The interest for our solutions is increasing, many company and organisations require efficient solutions to deal with the rapidly growing amounts of data that can fulfill their needs for visualisation and analysis of geographic information. Carmenta is growing in Sweden, Germany, Spain and France.*

Now we are looking for experienced C#/C++ developers to join our teams in Gothenburg, Stockholm, Munich and Paris.

### Qualifications:

The most important qualification is that you have very strong programming skills and you love challenging software development.

### You also need:

- At least an MSc in Computer Science/IT, or an equivalent degree
- A few years of relevant work experience
- Fluent English

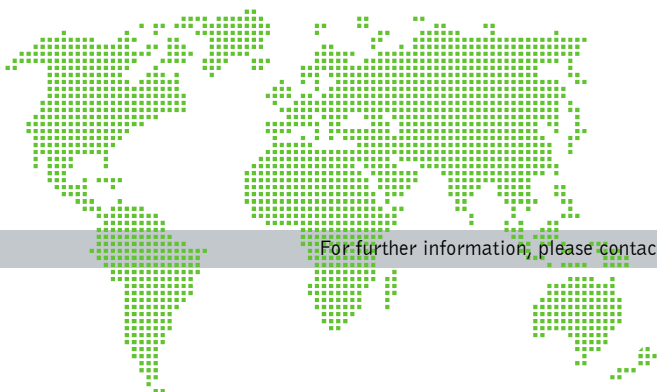

### We value experience in:

- GIS technology and tools
- Technical presales and support
- Application development for the defense and security sectors
- Windows application development using C#/WPF
- Linux development using Qt
- Development using modern C++
- Deployment of Docker solutions
- Skills in German and French are also of value

## Interested?
